

Human Embryos

The Debate on Assisted Reproduction

C. R. Austin

This book discusses, in a way accessible to non-specialists, the questions relating to the human embryo and new developments in reproductive medicine which have come to concern, puzzle, and even disturb many people.

0 19 261758 3, 174 pp., illus., Oxford Paperbacks, March 1989 £6.95

A Casebook of Medical Ethics

Terrence F. Ackerman and Carson Strong

This volume provides a set of case studies—drawn from a variety of specialties—that accurately portray the factual and moral dimensions of ethical issues arising in the clinical practice of medicine.

0 19 503916 5, 320 pp., OUP USA, June 1989 £26.00

Doctors' Decisions

Ethical Conflicts in Medical Practice

Edited by G. R. Dunstan and E. A. Shinebourne

Work on medical ethics tends to overlook application in practice. In this book, practitioners from a wide range of specialities describe the making of ethical choices in their everyday work. Their conclusions are examined by a moral philosopher, a Christian theologian, and a rabbinic scholar.

0 19 261631 5, 272 pp., illus., June 1989 £22.50

The Sanctity-of-Life Doctrine in Medicine

A Critique

Helga Kuhse

This book is the first comprehensive critique of the 'sanctity of life' doctrine. The doctrine is shown to be flawed and to lead to indefensible practical consequences.

0 19 824943 8, 240 pp., Clarendon Press, 1987 £25.00

Winner of the 1989 Swiney Prize for Medical Jurisprudence Studies in Medical Law

NEW IN PAPERBACK

Law, Ethics, and Medicine

P. D. G. Skegg

'... a splendid addition to the literature... strongly recommended not only to lawyers but also to doctors, philosophers and indeed the general reader.' *Times Higher Educational Supplement*.

Clarendon Paperbacks

0 19 825642 6, 288 pp., paperback, Clarendon Press, 1988 £12.95
0 19 825365 6, hardback, 1984 £35.00

The Unheeded Cry

Animal Consciousness, Animal Pain, and Science

Bernard Rollin

This book explains why and how scientists have been so cavalier about animal use, animal pain, and the moral questions involved.

Studies in Bioethics

0 19 217765 6, 320 pp., illus., April 1989 £17.50

Treat Me Right

Essays in Medical Law and Ethics

Ian Kennedy

This book brings together the best of the author's work in this field. Some of the articles have appeared in journals, but many are published here for the first time.

0 19 825559 4, 390 pp., Clarendon Press, 1988 £35.00

Medicine and the Law

Heinemann Medical Student Review Series

Dr Paul Knapman MB, BS, MRCS, LRCP, DMJ Barrister-at-Law, Her Majesty's Coroner for Inner West London; Honorary Senior Lecturer in Community Medicine, Westminster and Charing Cross Medical School.

Dr Iain West MB, ChB, MRCPATH, DMJ.

Head of the Department of Forensic Medicine, Guy's and St Thomas's Hospitals Medical Schools; Pathologist to the Home Office.

In an increasingly litigious world it is important that all doctors are informed about the law as it applies to their professional practice.

The book:

- covers medicolegal aspects of medicine
- describes the courts, medical reports, medical negligence and ethical problems
- concentrates on forensic medicine, including physical injury and sexual offences.

This book, brings together information from many sources, and is essential reading for medical undergraduate and junior doctors. Nurses and members of the allied health professions, including social workers will find in it much that is relevant to their clinical practice.

Many medical journals, including the *British Medical Journal* now expect scientific papers submitted to them to contain confidence intervals when appropriate. Why? what are they? and how do you calculate them? *Statistics with Confidence* tells you. A clear explanation of the reasons for using confidence intervals is followed by detailed presentation of methods of calculation, including numerous worked examples and specially compiled tables. To make things even easier, a computer programme, Confidence Interval Analysis (CIA), for calculating confidence intervals has been specially designed by Martin Gardner and details are available from the Publishing Department, *British Medical Journal*.

An essential handbook for everybody using statistical methods to present their findings (and that means most doctors). *Statistics with Confidence* can also be applied to other disciplines—such as engineering, agriculture, and the social sciences.

Price: Inland £7.95; Abroad £9.50; USA \$19.00
