

ABC OF BRAIN STEM DEATH

CHRISTOPHER PALLIS

The subject of brain stem death still arouses misconceptions—witness the response to the BBC *Panorama* programme on transplantation and brain death. Dr Christopher Pallis has dispelled some of the misconceptions, examined the concepts underlying our ideas of death, and described the practical aspects of diagnosing brain stem death. These articles have been collected into a book together with additional material on the wider aspects of the subject, including some of the neurological controversies.

NEW BOOKS FROM FABER

Healthy Respect

Ethics in Health Care

R. S. Downie MA, BPhil, FRSE and
K. C. Calman MD, PhD, FRCP, FRCS, FRSE
with a foreword by Sir Malcolm
Macnaughton MD, FRCOG, FRCP, FRSE

Recently health care professionals have become increasingly aware of the complexity of the moral dilemmas which can be created by caring. This book offers an introduction to moral concepts and values and illustrates how they can be identified and applied in particular situations. Specific medical problems are analysed, as well as general topics including consent, confidentiality, and the economics of health care.

£5.95 paper covers

The Dilemma of Abortion

Edwin Kenyon MA, MD, FRCP, FRCPsych

This book examines the important background factors to the abortion debate – the moral, religious, legal, medical, psychological and political issues. In addition, there is a critical look at the Warnock Report, and comment on the Gillick case and the subsequent judgment by the Law Lords.
