Embryo Experimentation

Edited by PETER SINGER, HELGA KUHSE,
STEPHEN BUCKLE, KAREN DAWSON and
PASCAL KASIMBA

An original contribution of major importance to the debate of embryo experimentation.

'I hope anyone who is going to have to vote on legislation in the near future will read all of this book, and consider it thoroughly. It is, both factually and in terms of values, the most clear, comprehensive and up-to-date consideration of embryo experimentation yet to appear, and written with great authority.'

Moral Theory and Medical Practice

K. W. M. FULFORD

Foreword by BARONESS WARNOCK

In this book, Dr Fulford shows how philosophical analysis, drawing directly on moral theory, can help to resolve difficulties in the practice of medicine and psychiatry which arise from the obscurity of our concepts of illness and disease.

'When it comes to thinking about the purpose and practice of medicine, Dr Fulford has something really new to say and a potentially revolutionary approach.'

MEDICAL STATISTICS ON MICROCOMPUTERS

R A BROWN,
J SWANSON BECK

BMJ

UK £8.95; Abroad £10.50
BMA members: £8.45 or £10.00
including postage by air abroad

How is no longer a problem — but there's still which and why

The microcomputer revolution has made powerful machines and highly complex programs generally available. This means that users of statistical techniques need no longer be concerned with the arithmetical and algebraic details — the software will take care of all that. What is vital, however, is to understand the ideas and the basic principles of statistical analysis. In *Medical Statistics on Microcomputers* R A Brown and J Swanson Beck show how to get the best use out of microcomputers when analysing data, particularly in the pathology laboratory. They explain the rational basis of various widely applicable statistical methods and also indicate their limitations so that you can make an informed choice. Chapters include:

- Data handling
- Analysis of data from one or two groups
- Comparison of several groups
- Analysis of categorical data
- Statistical methods for diagnostic tests.
