

Journal of Medical Genetics

February 1977 Vol. 14 No. 1

- Colchester revisited: A genetic study of mental defect *N. E. Morton, D. C. Rao, Helen Lang-Brown, C. J. Maclean, R. D. Bart, and Ruth Lew*
- Height and seriousness of crime in XYY men *Ernest B. Hook and Kristine M. Healy*
- Muscle nuclear changes in fetuses at risk for Duchenne muscular dystrophy *Demetris Vassilopoulos and Alan E. H. Emery*
- Immunoglobulin levels in dystrophia myotonica *D. F. Roberts and W. G. Bradley*
- Heterozygote advantage for the phenylketonuria allele *Letten Fegersten Saugstad*
- A simple non-graphic method for pedigree description and analysis *Tamar Schaap and Maimon M. Cohen*
- Unusual occurrence of dextrocardia with situs inversus in succeeding generations of a family *P. Chib, D. N. Grover, and B. N. Shani*
- Two cases of Ellis-van Creveld syndrome in a small island population *R. D. Hill*
- Prenatal diagnosis: techniques used to help in ruling out maternal cell contamination *D. C. Peakman, Marilyn F. Moreton, and Arthur Robinson*
- A fluorescence polymorphism associated with Down's syndrome? *Jacqueline A. Robinson and Marjorie Newton*
- Familial X-linked mental retardation with an X chromosome abnormality *J. Harvey, C. Judge, and S. Wiener*
- Myotonic dystrophy, syringomyelia, and 2/13 translocation in the same family *Ruth Blay Levisky, Angela M. Vianna-Morgante, O. Frota-Pessoa, M. Scaff, Ana Maria C. Tsanaclis, and J. A. Levy*
- Four new cases of ring 21 and 22 including familial transmission of ring 21 *C. G. Palmer, M. E. Hodes, T. Reed, and J. Kojetin*
- Case reports:**
- Physical retardation associated with ring chromosome mosaicism: 46,XX,r(10)/45,XX,10-
Susan Lansky, W. Daniel, and Kathy Fleiszar
- 46,XX/46,XX,r(15) mosaicism. Report of a case *R. A. Pfeiffer, R. Dhadi, and W. Lenz*
- Stable dicentric autosome, tdc (8: 22) (p23: p13), in a mentally retarded girl *S. H. Roberts, R. T. Howell, K. M. Laurence, and M. E. Heathcote*
- Mental retardation with 45 chromosomes 45,XX,-5,-14,+der(5)t(5,14) (p15;q13) mat due to familial balanced reciprocal translocation *K. Fried, M. Tieder, S. Beer, M. Rosenblatt, and H. I. Krespin*
- Sex linked hydrocephalus *Ralph Cassie and A. R. Boon*
- Crossed asymmetry in Russell-Silver syndrome *Q. H. Qazi, E. G. Kassner, and C. Ganapathy*
- A new syndrome of cleft palate associated with coloboma, hypospadias, deafness, short stature, and radial synostosis *Michael A. Abruzzo and Robert P. Erickson*
-

**A DICTIONARY OF MEDICAL
ETHICS AND PRACTICE**

W. A. R. THOMSON, M.D., M.B., Ch.B.

Abortion, battered baby syndrome, clinical freedom, drug prescribing . . . the doctor in family practice is faced with an increasing burden of problems involving medical ethics. The Author selects topics on which the family practitioner may feel in need of information or advice and provides cogent summaries of the way in which current professional and lay thinking impinges on medical practice. Most articles are accompanied by an up-to-date list of references leading the reader into the public debate generated by new and often bewildering technical advances. This book gives useful and, at times, provocative counsel for the general practitioner, practising surgeon, gynaecologist and geriatrician.

**TODAY'S
TREATMENT/1**

Faced with a succession of new drugs, doctors need authoritative advice on the selection of the most effective remedies for common disorders; and that is the aim of *Today's Treatment*. This first volume contains articles published in the *BMJ* in 1974-75 on disorders of the skin and blood and on psychiatric and neurological diseases. These simple clear accounts of assessment and management provide all the information needed for a rational choice of the best treatment for each individual patient.
