

Subject index

- abortion**, Is there an ethical difference between preimplantation genetic diagnosis and abortion?, **90**
- adrenoleukodystrophy (ALD)**, Therapeutic cloning research and ethical oversight, **207**
- advance directives**, Physicians's reports on the impact of living wills at the end of life in Japan, **248**
- advanced cell technology (ACT)**, Therapeutic cloning research and ethical oversight, **207**
- aging**, When is physician assisted suicide or euthanasia acceptable?, **330**
- AIDS**, Investigating the origin of AIDS: some ethical dimensions, **253**
- altruism**, The altruistic act of asking, **193**
What's not wrong with conditional organ donation?, **163**
- Alzheimer's disease**, Relatives' attitudes towards informing patients about the diagnosis of Alzheimer's disease, **51**
- anatomy dissection**, The altruistic act of asking, **193**
- anger**, The implications of starvation induced psychological changes for the ethical treatment of hunger strikers, **243**
- applied ethics**, Absent virtues: the poacher becomes gamekeeper, **337**
- archival material**, Stored human tissue: an ethical perspective on the fate of anonymous, archival material, **343**
- artificial feeding**, Withholding artificial feeding from the severely demented: merciful or immoral? Contrasts between secular and Jewish perspectives, **208**
- artificial insemination by husband**, Use of assisted reproductive technology to reduce the risk of transmission of HIV in discordant couples wishing to have their own children where the male partner is seropositive with an undetectable viral load, **315**
- assisted reproductive technological blunders**, Assisted reproductive technological blunders (ARTBs), **205**
- assisted reproductive technologies**, Genetic ties and genetic mixups, **68**
Should HIV discordant couples have access to assisted reproductive technologies?, **325**
- assisted reproductive technology**, Use of assisted reproductive technology to reduce the risk of transmission of HIV in discordant couples wishing to have their own children where the male partner is seropositive with an undetectable viral load, **315**
- Assisted suicide**, Ethics briefings, **118**
- atonement**, Human organs from prisoners: kidneys for life, **171**
- authorisation**, Organ retention and return: problems of consent, **30**
- autonomy**, Confidentiality and the duties of care, **36**
Death, us and our bodies: personal reflections, **127**
Do the sick have a right to cadaveric organs?, **153**
It is immoral to require consent for cadaver organ donation, **125**
Modified mandated choice for organ procurement, **157**
Some limits of informed consent, **4**
- beneficence**, Auto-autonomy: the ethics of end of road-life issues, **260**
Death, us and our bodies: personal reflections, **127**
- best interests**, Should patient consent be required to write a do not resuscitate order?, **359**
- bioethics**, Absent virtues: the poacher becomes gamekeeper, **337**
Auto-autonomy: the ethics of end of road-life issues, **260**
Back to the future: response to: Extending preimplantation genetic diagnosis: medical and non-medical uses, **217**
What do patients value in their hospital care? An empirical perspective on autonomy centred bioethics, **103**
- body as property**, It is immoral to require consent for cadaver organ donation, **125**
- brain death**, A definition of human death should not be related to organ transplants, **201**
A volunteer to be killed for his organs, **175**
- brain donation**, Brain donation for schizophrenia research: gift, consent, and meaning, **165**
- brainstem death**, A definition of human death should not be related to organ transplants, **201**
- BRCA1/2 testing**, Balancing autonomy and responsibility: the ethics of generating and disclosing genetic information, **74**
- British Medical Association**, Juggling law, ethics, and intuition: practical answers to awkward questions, **281**
- cadaver organ donation**, It is immoral to require consent for cadaver organ donation, **125**
Organ procurement: dead interests, living needs, **130**
- cadaveric donation**, Modified mandated choice for organ procurement, **157**
- cadaveric organs**, Do the sick have a right to cadaveric organs?, **153**
- cadavers**, Stored human tissue: an ethical perspective on the fate of anonymous, archival material, **343**
- capacity**, Incapacity to give informed consent owing to mental disorder, **41**
- care based ethics**, Balancing autonomy and responsibility: the ethics of generating and disclosing genetic information, **74**
- caregivers/psychology**, Relatives' attitudes towards informing patients about the diagnosis of Alzheimer's disease, **51**
- case studies**, Confidentiality and the ethics of medical ethics, **220**
- Child protection**, Ethics briefings, **263**
- Christianity**, Confidentiality and its limits: some contributions from Christianity, **8**
- Clinical ethics**, Action v inaction: a case history in ethics, **225**
- clinical genetics**, Concern for families and individuals in clinical genetics, **70**
- clinical guidelines**, Priority setting in cardiac surgery: a survey of decision making and ethical issues, **353**
- cloning**, What exactly is an exact copy? And why it matters when trying to ban human reproductive cloning in Australia, **84**
- cohort studies**, "Cold calling" in psychiatric follow up studies: is it justified?, **238**
- commitment**, Challenging non-compliance, **257**
- commodification**, Commodification and exploitation: arguments in favour of compensated organ donation, **142**
- communicable disease surveillance**, Common sense and common consent in communicable disease surveillance, **27**
- communitarianism**, Do the sick have a right to cadaveric organs?, **153**
Principlism and communitarianism, **287**
- confidentiality**, Common sense and common consent in communicable disease surveillance, **27**
Confidentiality and its limits: some contributions from Christianity, **8**
Confidentiality and the duties of care, **36**
Confidentiality and the ethics of medical ethics, **220**
Consent and confidentiality—where are the limits? An introduction, **2**
Consent and end of life decisions, **10**
Issues of consent and feedback in a genetic epidemiological study of women with breast cancer, **93**
- conflict of interest**, Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- consent**, Brain donation for schizophrenia research: gift, consent, and meaning, **165**
Confidentiality and the ethics of medical ethics, **220**
Consent and end of life decisions, **10**
Organ retention and return: problems of consent, **30**
Research on the mentally incompetent, **19**
Should patient consent be required to write a do not resuscitate order?, **359**
Stored human tissue: an ethical perspective on the fate of anonymous, archival material, **343**
- consent for the mentally incompetent**, Research on the mentally incompetent, **19**
- consent for transplantation**, Presumed consent for transplantation: a dead issue after Alder Hey?, **147**
- consent procedures**, Issues of consent and feedback in a genetic epidemiological study of women with breast cancer, **93**
- contested concepts**, Medicine as an essentially contested concept, **261**
- copyright**, Consensus and contention regarding redundant publications in clinical research: cross-sectional survey of editors and authors, **109**
- corruption allegations**, What is saving of human life worth in Poland?, **116**
- cost effectiveness**, NICE, the draft fertility guideline and dodging the big question, **313**

- cross-sectional studies**, Psychiatric research: what ethical concerns do LRECs encounter? A postal survey, **55**
- culture**, Attitudes of Swedes to marginal donors and xenotransplantation, **186**
- dangerousness**, Dangerousness, mental disorder, and responsibility, **232**
Psychiatry and the control of dangerousness: a comment, **235**
- dangerousness to self and others**, Psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **227**
Response to: comments on psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **237**
- Data Protection Act 1998 (UK)**, The requirements of the Data Protection Act 1998 for the processing of medical data, **34**
- death**, A definition of human death should not be related to organ transplants, **201**
- decision making**, Priority setting in cardiac surgery: a survey of decision making and ethical issues, **353**
- definition of death**, Defining death in non-heart beating organ donors, **182**
Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- Definition of an "embryo"**, Ethics briefings, **263**
- definitions of death**, Death, us and our bodies: personal reflections, **127**
- dementia**, Withholding artificial feeding from the severely demented: merciful or immoral? Contrasts between secular and Jewish perspectives, **208**
- diabetic**, Challenging non-compliance, **257**
- diet**, Challenging non-compliance, **257**
- disclosure**, The utilitarian argument for medical confidentiality: a pilot study of patients' views, **348**
- DNA**, The double helix 50 years on: models, metaphors, and reductionism, **63**
- do not resuscitate orders**, Should patient consent be required to write a do not resuscitate order?, **359**
- doctors' pay**, What is saving of human life worth in Poland?, **116**
- double effect**, Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- double helix**, The double helix 50 years on: models, metaphors, and reductionism, **63**
- duplicate publication**, Consensus and contention regarding redundant publications in clinical research: cross-sectional survey of editors and authors, **109**
- early onset Alzheimer's disease**, Commentary on Spriggs: genetically selected baby free of inherited predisposition to early onset Alzheimer's disease, **120**
- educational measurement**, Differences in medical students' attitudes to academic misconduct and reported behaviour across the years—a questionnaire study, **97**
- electronic correspondence**, Electronic submissions to the *Journal of Medical Ethics*, **120**
- embryo screening**, Extending preimplantation genetic diagnosis: medical and non-medical uses, **213**
- end of life decision making**, Action v inaction: a case history in ethics, **225**
- end of life decisions**, Consent and confidentiality—where are the limits? An introduction, **2**
Consent and end of life decisions, **10**
Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- end of life issues**, Withholding artificial feeding from the severely demented: merciful or immoral? Contrasts between secular and Jewish perspectives, **208**
- Entertainment media and public health**, Ethics briefings, **263**
- Equity and prison health care**, Ethics briefings, **118**
- ethical markets**, An ethical market in human organs, **137**
Commentary. An ethical market in human organs, **139**
Janet Radcliffe Richards on our modest proposal, **141**
Is the sale of body parts wrong?, **138**
- ethical principles**, Priority setting in cardiac surgery: a survey of decision making and ethical issues, **353**
- ethical problems of psychiatry**, Psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **227**
Response to: comments on psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **237**
- ethics**, Attitudes of Swedes to marginal donors and xenotransplantation, **186**
Commodification and exploitation: arguments in favour of compensated organ donation, **142**
Differences in medical students' attitudes to academic misconduct and reported behaviour across the years—a questionnaire study, **97**
Human organs from prisoners: kidneys for life, **171**
Relatives' attitudes towards informing patients about the diagnosis of Alzheimer's disease, **51**
- ethics briefings**, Access to health records, **57**
Female genital mutilation, **57**
Ethics briefings, **118**
Ethics briefings, **369**
Medicine as an essentially contested concept, **261**
Mental health, **58**
- ethics committees**, Psychiatric research: what ethical concerns do LRECs encounter? A postal survey, **55**
Reporting of informed consent and ethics committee approval in genetics studies of stroke, **371**
- ethics of human organ donation**, An ethical market in human organs, **137**
Cadaveric tissue donation: a pathologist's perspective, **135**
Commentary. An ethical market in human organs, **139**
Janet Radcliffe Richards on our modest proposal, **141**
Is the sale of body parts wrong?, **138**
- ethics of psychiatric research**, Research on the mentally incompetent, **19**
- ethics of psychiatry**, Dangerousness, mental disorder, and responsibility, **232**
- European regulation**, Regulating stem cell research in Europe by the back door, **203**
- euthanasia**, Auto-autonomy: the ethics of end of road-life issues, **260**
When is physician assisted suicide or euthanasia acceptable?, **330**
- evidence based medicine**, Priority setting in cardiac surgery: a survey of decision making and ethical issues, **353**
- exploitation**, Commodification and exploitation: arguments in favour of compensated organ donation, **142**
- feedback of research results**, Issues of consent and feedback in a genetic epidemiological study of women with breast cancer, **93**
- fertility treatment**, NICE, the draft fertility guideline and dodging the big question, **313**
- four principles approach to medical ethics**, Applying the four principles, **275**
Ethics needs principles—four can encompass the rest—and respect for autonomy should be "first among equals", **307**
In praise of unprincipled ethics, **303**
Juggling law, ethics, and intuition: practical answers to awkward questions, **281**
- four principles of medical ethics**, A virtue ethics approach to moral dilemmas in medicine, **297**
- fraud**, Differences in medical students' attitudes to academic misconduct and reported behaviour across the years—a questionnaire study, **97**
- futility**, Should patient consent be required to write a do not resuscitate order?, **359**
- future legal status of tissue blocks and slides**, Ethics briefings, **118**
- gender selection**, Extending preimplantation genetic diagnosis: medical and non-medical uses, **213**
- generic consent**, Some limits of informed consent, **4**
- genetic counselling**, Concern for families and individuals in clinical genetics, **70**
- genetic engineering**, American biofutures: ideology and utopia in the Fukuyama/Stock debate, **59**
- genetic information**, Concern for families and individuals in clinical genetics, **70**
- genetic kinship**, What makes a parent? It's not black or white, **66**
- genetic risk information**, Issues of consent and feedback in a genetic epidemiological study of women with breast cancer, **93**
- genetics**, Consent and confidentiality in genetics: whose information is it anyway?, **16**
Genetic ties and genetic mixups, **68**
The virtues (and vices) of the four principles, **292**
- genetics research**, Reporting of informed consent and ethics committee approval in genetics studies of stroke, **371**

- germline enhancement**, Four scenarios, **267**
In praise of unprincipled ethics, **303**
- good quality data**, Confidentiality and the duties of care, **36**
- government funded research**, Therapeutic cloning research and ethical oversight, **207**
- harming the dead**, A stronger policy of organ retrieval from cadaveric donors: some ethical considerations, **196**
- health care**, Confidentiality and the duties of care, **36**
- Hippocratic oath**, The white coat ceremony: a contemporary medical ritual, **364**
White coat ceremonies—another commentary, **367**
- HIV**, Investigating the origin of AIDS: some ethical dimensions, **253**
- HIV discordant couples**, Should HIV discordant couples have access to assisted reproductive technologies?, **325**
Use of assisted reproductive technology to reduce the risk of transmission of HIV in discordant couples wishing to have their own children where the male partner is seropositive with an undetectable viral load, **315**
- HIV positive people**, The physician as an accessory in the parental project of HIV positive people, **321**
- HLA matching**, Extending preimplantation genetic diagnosis: medical and non-medical uses, **213**
- HOTA**, Unrelated living organ donation: ULTRA needs to go, **169**
- How should students learn? Some continuing difficulties with consent**, Ethics briefings, **118**
- human organ donation**, An ethical market in human organs, **137**
Commentary. An ethical market in human organs, **139**
Janet Radcliffe Richards on our modest proposal, **141**
Is the sale of body parts wrong?, **138**
- human reproductive cloning**, What exactly is an exact copy? And why it matters when trying to ban human reproductive cloning in Australia, **84**
- human tissue regulations**, Stored human tissue: an ethical perspective on the fate of anonymous, archival material, **343**
- humanism**, The white coat ceremony: a contemporary medical ritual, **364**
- hunger striking**, The implications of starvation induced psychological changes for the ethical treatment of hunger strikers, **243**
- immunisation**, Misled and confused? Telling the public about MMR vaccine safety, **22**
- impairment**, Incapacity to give informed consent owing to mental disorder, **41**
- implied consent**, Some limits of informed consent, **4**
- impulsivity**, The implications of starvation induced psychological changes for the ethical treatment of hunger strikers, **243**
- in vitro fertilisation**, Commentary on Spriggs: genetically selected baby free of inherited predisposition to early onset Alzheimer's disease, **120**
Genetic ties and genetic mixups, **68**
Use of assisted reproductive technology to reduce the risk of transmission of HIV in discordant couples wishing to have their own children where the male partner is seropositive with an undetectable viral load, **315**
- incapacity**, Incapacity to give informed consent owing to mental disorder, **41**
- incompetence**, Incapacity to give informed consent owing to mental disorder, **41**
- individualism**, Confidentiality and its limits: some contributions from Christianity, **8**
- infertility treatment**, The physician as an accessory in the parental project of HIV positive people, **321**
- informal caregiver**, Knowledge of the legislation governing proxy consent to treatment and research, **44**
- information integration**, When is physician assisted suicide or euthanasia acceptable?, **330**
- informed consent**, Applying the four principles, **275**
Balancing autonomy and responsibility: the ethics of generating and disclosing genetic information, **74**
Challenging non-compliance, **257**
Common sense and common consent in communicable disease surveillance, **27**
Consent and confidentiality in genetics: whose information is it anyway?, **16**
Consent and confidentiality—where are the limits? An introduction, **2**
- Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- “Cold calling” in psychiatric follow up studies: is it justified?, **238**
- Presumed consent for transplantation: a dead issue after Alder Hey?, **147**
- Reporting of informed consent and ethics committee approval in genetics studies of stroke, **371**
- Some limits of informed consent, **4**
- intention**, Commentary on Szasz, **230**
- intercultural ethics**, Ethics needs principles—four can encompass the rest—and respect for autonomy should be “first among equals”, **307**
- interdisciplinary research**, Attitudes of Swedes to marginal donors and xenotransplantation, **186**
- IVF**, IVF mixup: white couple have black babies, **65**
- NICE, the draft fertility guideline and dodging the big question, **313**
- Should HIV discordant couples have access to assisted reproductive technologies?, **325**
- What makes a parent? It's not black or white, **66**
- James Childress**, Ethics needs principles—four can encompass the rest—and respect for autonomy should be “first among equals”, **307**
In praise of unprincipled ethics, **303**
Principlism and communitarianism, **287**
- Japan**, Physicians's reports on the impact of living wills at the end of life in Japan, **248**
- Jehovah's Witnesses**, Applying the four principles, **275**
Ethics needs principles—four can encompass the rest—and respect for autonomy should be “first among equals”, **307**
Four scenarios, **267**
Juggling law, ethics, and intuition: practical answers to awkward questions, **281**
Methods and principles in biomedical ethics, **269**
The virtues (and vices) of the four principles, **292**
- Jewish law**, Withholding artificial feeding from the severely demented: merciful or immoral? Contrasts between secular and Jewish perspectives, **208**
- Jewish medical ethics**, Withholding artificial feeding from the severely demented: merciful or immoral? Contrasts between secular and Jewish perspectives, **208**
- Journal of Medical Ethics**, Institute of Medical Ethics prize for the most innovative web publication, **1**
- judgments**, When is physician assisted suicide or euthanasia acceptable?, **330**
- justice**, Auto-autonomy: the ethics of end of road-life issues, **260**
Genetic ties and genetic mixups, **68**
- kidney transplantation**, Unrelated living organ donation: ULTRA needs to go, **169**
- knowledge**, Knowledge of the legislation governing proxy consent to treatment and research, **44**
- late onset disorders**, Commentary on Spriggs: genetically selected baby free of inherited predisposition to early onset Alzheimer's disease, **120**
- law and medical ethics**, Electronic submissions to the *Journal of Medical Ethics*, **120**
Juggling law, ethics, and intuition: practical answers to awkward questions, **281**
- left over body material**, Cadaveric tissue donation: a pathologist's perspective, **135**
- legislation**, Knowledge of the legislation governing proxy consent to treatment and research, **44**
- lifestyle**, Challenging non-compliance, **257**
- literature and medicine**, The altruistic act of asking, **193**
- living organ donation**, Unrelated living organ donation: ULTRA needs to go, **169**
- living wills**, Physicians's reports on the impact of living wills at the end of life in Japan, **248**
- lying**, Confidentiality and its limits: some contributions from Christianity, **8**
- mandated choice**, Modified mandated choice for organ procurement, **157**
- marginal donors**, Attitudes of Swedes to marginal donors and xenotransplantation, **186**
- medical complications**, Patient organisations should also establish databanks on medical complications, **115**

- medical confidentiality**, The utilitarian argument for medical confidentiality: a pilot study of patients' views, **348**
- medical data**, The requirements of the Data Protection Act 1998 for the processing of medical data, **34**
- medical education**, The white coat ceremony: a contemporary medical ritual, **364**
White coat ceremonies—another commentary, **367**
- medical ethics**, The white coat ceremony: a contemporary medical ritual, **364**
- medical ethics on the web**, Institute of Medical Ethics prize for the most innovative web publication, **1**
- Medical experts**, Ethics briefings, **263**
- medical power**, Patient organisations should also establish databanks on medical complications, **115**
- medical student**, The white coat ceremony: a contemporary medical ritual, **364**
- medical students**, White coat ceremonies—another commentary, **367**
- medicine**, Medicine as an essentially contested concept, **261**
- mental disorder**, Dangerousness, mental disorder, and responsibility, **232**
Incapacity to give informed consent owing to mental disorder, **41**
- mental disorders**, Psychiatric research: what ethical concerns do LRECs encounter? A postal survey, **55**
- mental illness**, Incapacity to give informed consent owing to mental disorder, **41**
Psychiatry and the control of dangerousness: a comment, **235**
Psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **227**
Response to: comments on psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **237**
- mental states**, Commentary on Szasz, **230**
- methicillin resistant staphylococcus aureus**, MRSA in the Netherlands: preventive measure raises a moral issue, **212**
- MMR vaccine**, Mised and confused? Telling the public about MMR vaccine safety, **22**
- moral values**, Why I don't believe in moral values: a comment on Culyer, **242**
- morality**, Auto-autonomy: the ethics of end of road-life issues, **260**
- MRSA**, MRSA in the Netherlands: preventive measure raises a moral issue, **212**
- multiple pregnancies**, Neonatal outcomes and risk/benefit ratio of induced multiple pregnancies, **259**
- mutation searching**, Balancing autonomy and responsibility: the ethics of generating and disclosing genetic information, **74**
- narrative ethics**, The altruistic act of asking, **193**
- needs**, NICE, the draft fertility guideline and dodging the big question, **313**
What's not wrong with conditional organ donation?, **163**
- neonatal**, Neonatal outcomes and risk/benefit ratio of induced multiple pregnancies, **259**
- neuroscience**, Brain donation for schizophrenia research: gift, consent, and meaning, **165**
- NICE**, NICE, the draft fertility guideline and dodging the big question, **313**
- non-heart beating organ donation**, Non-heart beating organ donation: old procurement strategy—new ethical problems, **176**
- non-heart beating organ donors**, Defining death in non-heart beating organ donors, **182**
- non-maleficence**, Auto-autonomy: the ethics of end of road-life issues, **260**
- non-medical screening**, Extending preimplantation genetic diagnosis: medical and non-medical uses, **213**
- oath taking**, White coat ceremonies—another commentary, **367**
- obligation**, Do the sick have a right to cadaveric organs?, **153**
- older adult**, Knowledge of the legislation governing proxy consent to treatment and research, **44**
- opting out**, Organ procurement: dead interests, living needs, **130**
- organ donation**, A volunteer to be killed for his organs, **175**
Commodification and exploitation: arguments in favour of compensated organ donation, **142**
Death, us and our bodies: personal reflections, **127**
Defining death in non-heart beating organ donors, **182**
Four scenarios, **267**
Human organs from prisoners: kidneys for life, **171**
In praise of unprincipled ethics, **303**
Methods and principles in biomedical ethics, **269**
Modified mandated choice for organ procurement, **157**
Presumed consent for transplantation: a dead issue after Alder Hey?, **147**
The altruistic act of asking, **193**
What's not wrong with conditional organ donation?, **163**
- organ retention**, Organ retention and return: problems of consent, **30**
- organ retrieval from cadaveric donors**, A stronger policy of organ retrieval from cadaveric donors: some ethical considerations, **196**
- organ sale**, Commodification and exploitation: arguments in favour of compensated organ donation, **142**
- organ transplantation**, Applying the four principles, **275**
Cadaveric tissue donation: a pathologist's perspective, **135**
Modified mandated choice for organ procurement, **157**
- organ transplants**, A definition of human death should not be related to organ transplants, **201**
- parental rights**, What makes a parent? It's not black or white, **66**
- parenthood**, Genetic ties and genetic mixups, **68**
IVF mixup: white couple have black babies, **65**
What makes a parent? It's not black or white, **66**
- patient autonomy**, What do patients value in their hospital care? An empirical perspective on autonomy centred bioethics, **103**
- patient organisations**, Patient organisations should also establish databanks on medical complications, **115**
- patients' views**, The utilitarian argument for medical confidentiality: a pilot study of patients' views, **348**
- philosophy of medicine**, The double helix 50 years on: models, metaphors, and reductionism, **63**
- philosophy of science**, The double helix 50 years on: models, metaphors, and reductionism, **63**
- physician**, Physicians's reports on the impact of living wills at the end of life in Japan, **248**
- physician assisted suicide**, Electronic submissions to the *Journal of Medical Ethics*, **120**
When is physician assisted suicide or euthanasia acceptable?, **330**
- physician responsibility**, The physician as an accessory in the parental project of HIV positive people, **321**
- physician/patient relations**, Physicians's reports on the impact of living wills at the end of life in Japan, **248**
Relatives' attitudes towards informing patients about the diagnosis of Alzheimer's disease, **51**
- plagiarism**, Differences in medical students' attitudes to academic misconduct and reported behaviour across the years—a questionnaire study, **97**
- polio vaccines**, Investigating the origin of AIDS: some ethical dimensions, **253**
- Polish medical care**, What is saving of human life worth in Poland?, **116**
- political philosophy**, American biofutures: ideology and utopia in the Fukuyama/Stock debate, **59**
- preimplantation genetic diagnosis**, Bach to the future: response to: Extending preimplantation genetic diagnosis: medical and non-medical uses, **217**
Commentary on Spriggs: genetically selected baby free of inherited predisposition to early onset Alzheimer's disease, **120**
Extending preimplantation genetic diagnosis: medical and non-medical uses, **213**
Is there an ethical difference between preimplantation genetic diagnosis and abortion?, **90**
- presumed consent**, Modified mandated choice for organ procurement, **157**
- presumed consent for transplantation**, Presumed consent for transplantation: a dead issue after Alder Hey?, **147**
- principlism**, Absent virtues: the poacher becomes gamekeeper, **337**
Ethics needs principles—four can encompass the rest—and respect for autonomy should be "first among equals", **307**
Principlism and communitarianism, **287**
- priority setting, risk index**, Priority setting in cardiac surgery: a survey of decision making and ethical issues, **353**
- prisoners**, Human organs from prisoners: kidneys for life, **171**
- private research**, Therapeutic cloning research and ethical oversight, **207**
- professional ethics**, Confidentiality and the ethics of medical ethics, **220**
- professional-patient relations**, What do patients value in their hospital care? An empirical perspective on autonomy centred bioethics, **103**

- proxy consent for research involving incapacitated adults**, Ethics briefings, **263**
- psychiatric preventive detention**, Psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **227**
Response to: comments on psychiatry and the control of dangerousness: on the apotropaic function of the term "mental illness", **237**
- psychiatry**, Commentary on Szasz, **230**
Dangerousness, mental disorder, and responsibility, **232**
"Cold calling" in psychiatric follow up studies: is it justified?, **238**
Psychiatry and the control of dangerousness: a comment, **235**
The implications of starvation induced psychological changes for the ethical treatment of hunger strikers, **243**
- public health**, Misled and confused? Telling the public about MMR vaccine safety, **22**
Should HIV discordant couples have access to assisted reproductive technologies?, **325**
- public participation**, Regulating stem cell research in Europe by the back door, **203**
- public policy**, Bach to the future: response to: Extending preimplantation genetic diagnosis: medical and non-medical uses, **217**
- publication ethics**, Confidentiality and the ethics of medical ethics, **220**
Consensus and contention regarding redundant publications in clinical research: cross-sectional survey of editors and authors, **109**
- qualitative study**, Balancing autonomy and responsibility: the ethics of generating and disclosing genetic information, **74**
- Raanan Gillon**, A virtue ethics approach to moral dilemmas in medicine, **297**
Applying the four principles, **275**
Festschrift edition of the *Journal of Medical Ethics* in honour of Raanan Gillon, **265**
In praise of unprincipled ethics, **303**
Principlism and communitarianism, **287**
The virtues (and vices) of the four principles, **292**
- racism**, What's not wrong with conditional organ donation?, **163**
- reductionism**, The double helix 50 years on: models, metaphors, and reductionism, **63**
- redundant publication**, Consensus and contention regarding redundant publications in clinical research: cross-sectional survey of editors and authors, **109**
