Volume 43 Issue 2 | February 2017

Introduction

- 65 The benefit/risk ratio challenge in clinical research, and the case of HIV cure: an introduction *N Eyal*

OPEN ACCESS

Background

- 67 Why cure, why now? *D R Kuritzkes*
- 71 Improving on effective antiretroviral therapy: how good will a cure have to be? *K A Freedberg, P E Sax*
- 74 How to keep high-risk studies ethical: classifying candidate solutions *N Eyal*

Benefits to participants

- 90 Why high-risk, non-expected-utility-maximising gambles can be rational and beneficial: the case of HIV cure studies *L Buchak*
- 96 For love and money: the need to rethink benefits in HIV cure studies *E Largent*

OPEN ACCESS

- 100 An activist's argument that participant values should guide risk–benefit ratio calculations in HIV cure research *D Evans*

OPEN ACCESS

Informed consent

- 104 Cure research and consent: the Mississippi Baby, Barney Clark, Baby Fae and Martin Delaney *G J Annas*
- 108 Informed consent to HIV cure research *D Bromwich, J R Millum*

Benefits to nonparticipants

- 114 Must research benefit human subjects if it is to be permissible? *D Wikler*
- 118 The social value of candidate HIV cures: actualism versus possibilism *R Brown, N G Evans*
- 124 Contractualist reasoning, HIV cure clinical trials, and the moral (ir)relevance of the risk/benefit ratio *R Kumar*
- 128 The morality of risks in research: reflections on Kumar *F M Kamm*
