

Introduction

- 65** The benefit/risk ratio challenge in clinical research, and the case of HIV cure: an introduction *N Eyal*
 OPEN ACCESS

Background

- 67** Why cure, why now? *D R Kuritzkes*
 OPEN ACCESS
- 71** Improving on effective antiretroviral therapy: how good will a cure have to be? *K A Freedberg, P E Sax*
 OPEN ACCESS
- 74** How to keep high-risk studies ethical: classifying candidate solutions *N Eyal*
 OPEN ACCESS

Risks

- 78** First-in-human HIV-remission studies: reducing and justifying risk *R Dresser*
- 82** When to start paediatric testing of the adult HIV cure research agenda? *S K Shah*
 OPEN ACCESS
- 87** Risk and radical uncertainty in HIV research *C Hare*
 OPEN ACCESS

Benefits to participants

- 90** Why high-risk, non-expected-utility-maximising gambles can be rational and beneficial: the case of HIV cure studies *L Buchak*
- 96** For love and money: the need to rethink benefits in HIV cure studies *E Largent*
 OPEN ACCESS

- 100** An activist's argument that participant values should guide risk-benefit ratio calculations in HIV cure research *D Evans*
 OPEN ACCESS

Informed consent

- 104** Cure research and consent: the Mississippi Baby, Barney Clark, Baby Fae and Martin Delaney *G J Annas*
- 108** Informed consent to HIV cure research *D Bromwich, J R Millum*

Benefits to nonparticipants

- 114** Must research benefit human subjects if it is to be permissible? *D Wikler*
 OPEN ACCESS
- 118** The social value of candidate HIV cures: actualism versus possibilism *R Brown, N G Evans*
 OPEN ACCESS
- 124** Contractualist reasoning, HIV cure clinical trials, and the moral (ir)relevance of the risk/benefit ratio *R Kumar*
 OPEN ACCESS
- 128** The morality of risks in research: reflections on Kumar *F M Kamm*

Afterword

- 132** Afterword: returning to philosophical foundations in research ethics *N Eyal*
